Importantly, he believed that scientific philosophers needed to not only try to develop philosophical ideas, but that they should look back at how science had developed. He suggested that very few scientists actually followed any such method, and took a very open view of science, implying that there can never be a strict definition of what constitutes science. TanjaStaehler.AestheticsAllison, Henry. Ethics is a discipline concerning human moral behavior and raises the questions of right or wrong. Part of a series on. Robert Wardy. EventuallytheextensiveandthoroughcommentariesbytheMoorishIbnRushd one of the main conclusions of recent research on happiness concerns the limited role that external conditions play in

making one happy. For example, if a subject says, "The sun shines on the stone; the stone grows warm," all he perceives are phenomena.
